Thank you for registering your Domain Name with us!

Your domain name has been submitted. It will take

approximately one day to be completed and appear on the web.

All domain names processed before 7pm EST are included in the
nightly global domain name database update.

It will take approximately a day until your new domain name appears in the "whois" domain name lookup. Until then, your domain may appear as still "available".

Not to worry! Our automated registration system has instantly submitted your domain name application without delay. Applications are processed on a first-com-first-serve basis.

Try to browse your new domain name tomorrow. Your free welcome page or forwarded web site should appear, confirming that your setup has been completed.

At that time, you can also begin to use your free catch-all email forwarding address (anyname@yourdomain.com) to receive email if you included your email address on the catch-all part of the application.

You can always add/change your email or web forwarding address by sending an email to: support@getaname.com

Please be sure to include your domain name with your request. By the way, there is no charge for additions or changes to your email or web forwarding settings.

Thank you again for your domain registration, and please feel free to contact us if we may be of any further assistance.

Best Regards,

Customer Service
